

COM 2 MAILBOX DATASHEET

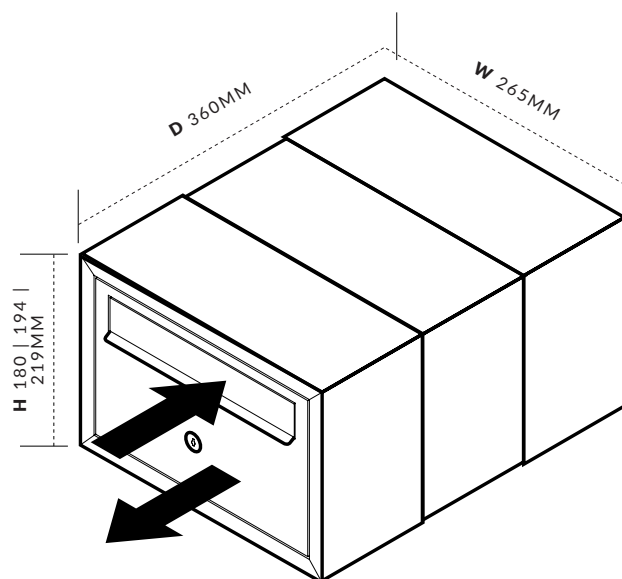

Sugar Quay, London

The COM 2 mailbox forms an integral part of our popular COM range, offering delicate features with high quality and robust materials to ensure maximum security. The COM 2 is an in front / out front horizontal product that is suitable for use in both internal and external locations. The COM 2 mailbox is available in a variety of heights to suit capacity requirements, and also a landscape option allowing for every storage requirement to be catered for.

The COM 2 mailbox meets the Secured by Design Homes 2024 guidelines with the use of an additional gap restrictor that reduces the aperture opening size and reduces the potential for items to be retrieved through the entry slot.
