

COM 2 STEEL DOOR MAILBOX DATASHEET

Reflections Project

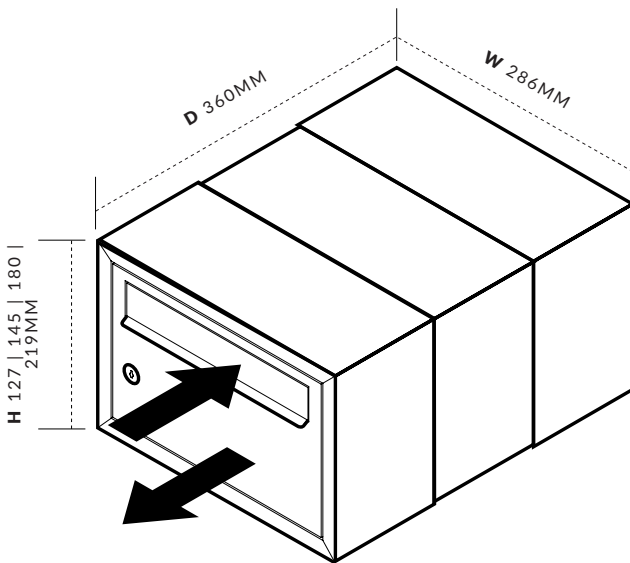

The COM 2 Steel Door mailbox offers a sleek alternative to the popular COM 2, featuring a Steel front door for a clean, polished look. This front-loading, front-retrieval horizontal unit is suitable for both internal and external installations.

Available in various heights and a landscape option, the COM 2 Steel Door mailbox caters to a wide range of storage needs.

It also complies with the Secured by Design Homes 2024 guidelines, when a gap restrictor is applied to reduce the aperture size, minimising the risk of items being retrieved through the mail slot.
