

CHUTED 2 MAILBOX DATASHEET

Design to Installation

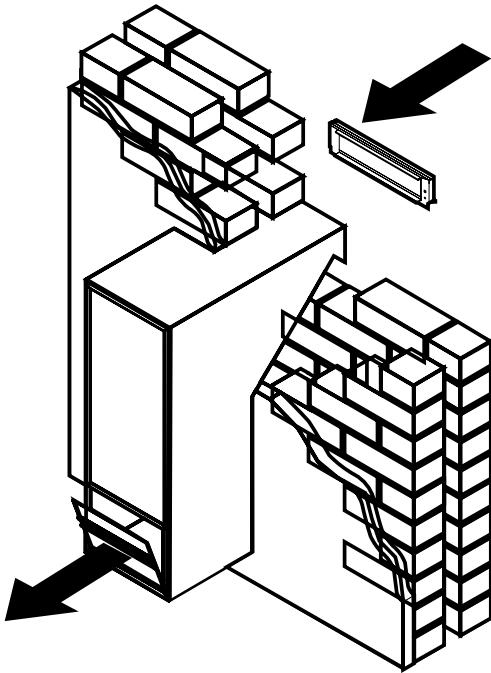

The Chuted 2 mailbox is an in-front, out-back design, intended for installation within an exterior wall to accommodate large volumes of mail. It is especially suited for secure locations such as government buildings, schools, and medical facilities where access to the interior must remain restricted.

The Chuted 2 mailbox is custom-built to meet the specific needs of each project, with adjustable dimensions to fit unique requirements.

Fitted with an SLB security lock, the mailbox comes with two coded keys as standard for secure access to the delivered mail.
