

GUARDIAN REAR RETRIEVAL (RR) MAILBOX DATASHEET

Design to Installation

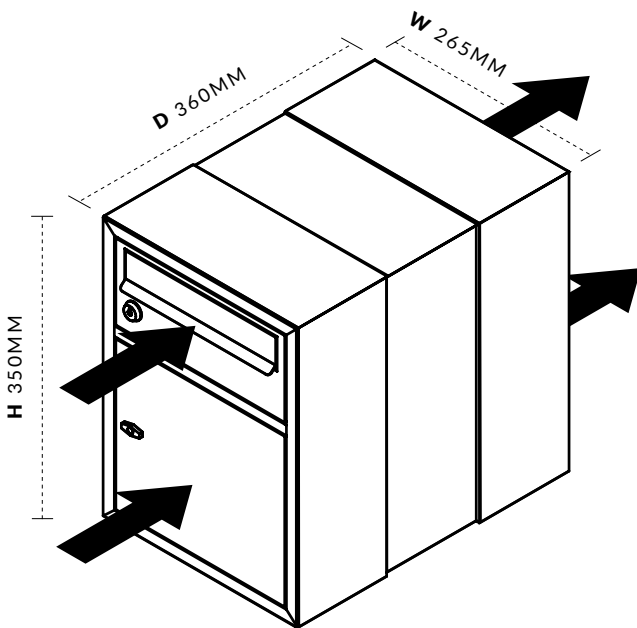

The Guardian RR box is an in-front, out-back solution designed to securely store mail in the top compartment while also functioning as a storage box in the bottom compartment. This design includes both locked and unlocked compartments, making it ideal for installation in external property walls.

The top section features a mail slot and is fitted with an SLB security lock, ensuring that mail remains securely stored until accessed with a coded key. The lower compartment is well-suited for holding items like milk, bread, and newspapers, allowing for convenient retrieval later on.
